Systemic Ritual®

Training Program

With Daan van Kampenhout

Barcelona,
from February 2022 to February 2023

Version 1-11-2021

Presentation

Systemic Ritual® was created by Daan van Kampenhout, over a period of about twenty years. The work contains elements of shamanism (ritual, prayer, use of ground plans as paths of healing, knowledge about the soul) and of family constellations (use of representation, healing sentences, knowledge about systemic loyalties and entanglements).

Goals

Participants in the training will get

- To know many of the formats used in Systemic Ritual®.
- To gain a thorough understanding of the building blocks of the method.
- To create their own systemic rituals, attuned to the needs of their clients.
- It is also an opportunity to learn via exchange and intervision with fellow students and colleagues. We will not just learn together with each other, but also from each other.

For whom

This training is for constellation leaders, psychologists, psychotherapists, family therapists, health care workers, social workers and teachers can apply for a place. Those have a background in shamanic work or dance therapy and who are leading groups in this field can also apply.

The SRT is explicitly not meant for people who want a completely new career, but is designed for professionals who are already working with groups and/or clients and who want to increase their knowledge, skills and increase the content of their tool box.

For this reason, the participants in the SRT must already have completed a professional schooling in a field where Systemic Ritual® can be integrated. It will be a recommendation if participants have completed a schooling in family constellation work.

Method

A training of about 20 days spread over a period of a little more than one year can never compete with, or replace, the professional education of (for example) a licensed psychotherapist. However, the work asks psychological, spiritual and professional maturity from the facilitator.

- In each meeting we will work with supervision cases for the training, these must come from all of the participants, please note that the students in the SRT are requested to bring one or two supervision cases to each meeting.
- Please note: the participants in the SRT are students and not clients – the focus of the program is on learning, not on the personal healing process of the participants.
- Next to the formats and training material that the participants will receive in the training, their own personal and professional life experience will be an important resource in this process.

Requisites

If you want to register in the SRT here are some essential requisites:

- To have some years experience in working with groups and/or clients.
- To have at least one open group of minimum two days with Daan, preferably more than one.
- To be working already in the fields of family constellations, dance therapy, shamanism or another practice where the Systemic Ritual can be integrated.
- To have experienced at least two personal family constellations as a client (facilitated by a trained constellator), or at least one Systemic Ritual as client, facilitated by Daan or by others.

Certification

Students who have completed the SRT will receive a certificate that states that they have completed the training and that they are allowed to use the name Systemic Ritual®, which is registered and protected by an international trademark.

Daan van Kampenhout

Shamanic practitioner for 35 years, Daan has studied with traditional healers and shamanic teachers of various cultures (Lakota, Southern-Ute, Sami and others). Combining elements of shamanic ritual and family constellations since 20 years, he developed Systemic Ritual.

Daan is the author of seven books, his writings have been translated in twelve languages. He works worldwide, creating rituals for different communities, minorities and groups. He lives in Amsterdam and Berlin.

In this training Daan will be supported and assisted by Moshe and Alejandra, who have both completed the SRT program earlier and use the method in their own work.
